

Web Filtering Active Time Period

Product: Antikor v2 - Next Generation Firewall
Configuration Examples

Web Filtering Active Time Period

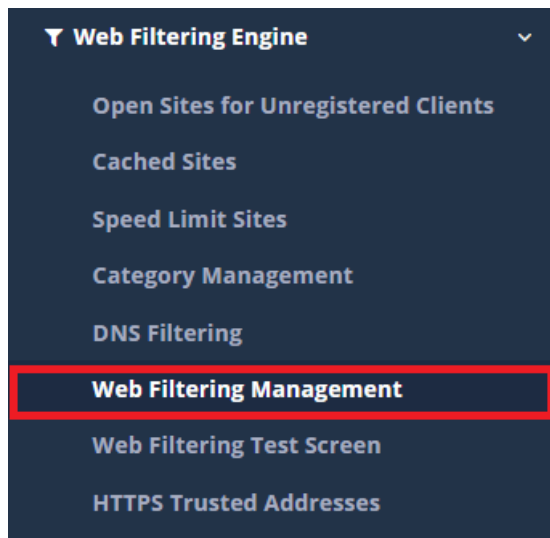

The time zone in which the stated disability and permit rules will be active can be specified.

Network Topology

Configuration

Firstly, click Web Filtering Management under the Web Filtering menu.

Then from Settings field Active time period specify.

A screenshot of the 'Settings' form for web filtering. The form has a header 'Settings' and a 'Safe Search' section with radio buttons for 'Open' and 'Closed' (selected). Below this is the 'Active Time Period' section, which is highlighted with a red border. It contains a dropdown menu showing 'Weekdays 08:00 - 18:00'. Below this are two dropdown menus for 'Allowed Categories' and 'Blocked Categories', both showing 'Select a Category'. At the bottom is a green 'Save' button.
