User-Based Access Record Reporting

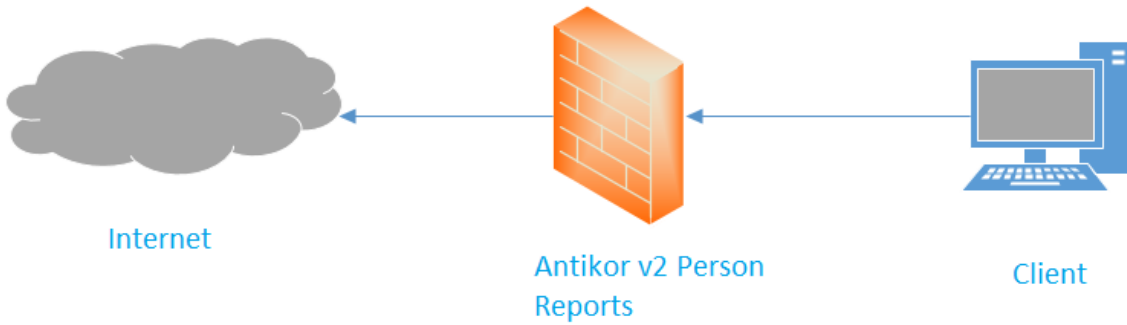

Product: Antikor v2 - Next Generation Firewall
Configuration Examples

User-Based Access Record Reporting

Summary

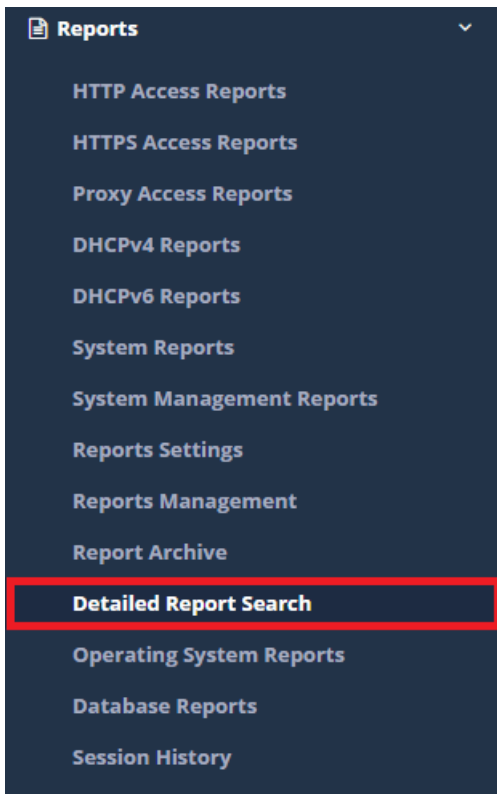

In networks with enrollment service turned on, each user has a user name and credentials. This service, which works with BTK's 5651 approved logging module, is the area in which ID information and username is included and its reports can be downloaded with various extensions.

Network Topology

Configuration

Firstly, click the Detailed Report Search under the Reports menu.

Reports are listed as follows and it's can be downloaded in the file formats specified on the upper left.
