User-Based Proxy Access Record Reporting

Product: Antikor v2 - Next Generation Firewall

Configuration Examples

User-Based Proxy Access Record Reporting

Summary

Proxy server or Authorized Server. It is an intermediate server used for accessing the Internet.

For example:

```
The browser connects to the proxy server and tells you which page you want
The proxy server connects to that page and retrieves the contents if necessary
The proxy server sends the content to the browser
```

It is the area where the number of users, the spent quotas and the number of connections are reported. IP addresses and user names can be viewed and reported in detail.
