Static Routing

Product: Antikor v2 - Next Generation Firewall

Configuration Examples

Static Routing

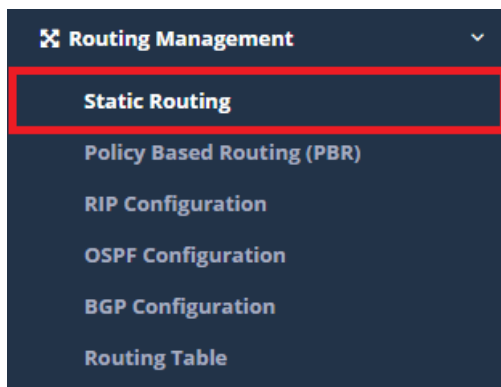

Static routing is a routing method that describes a way to configure the path selection for the network. The ip addresses are inserted manually and the records made can be viewed on the Routing Table page.

Network Topology

Configuration

Click, the Static Routing under the Routing Management menu.

By click "Add" button, make the necessary instructions and later click the "Save" button.

Static Routing - New Record ×

Status Active

Destination Network ×

Gateway IPv4
