www.epati.com.tr

## **epati** Network Definitions

This is the section where the network definitions are located. Within this section, you can create Network Groups and then assign IP addresses or networks to them. These definitions can also be used in access permissions in the security rules and in the private users section. To add a network group, you can define the IP address (es) / Network (s) you want to create from the Network Definitions - New Registration window that will come after you click on the Add button.

Network Groups	Delete Add Edit	Network Group Members				Update 📿 Reload 🕇 Add 主 Upl
