### Operation Mode

FIELD	DESCRIPTION
Limitless Access	The AntiKor2 interface is accessible from any IP address without IP address restriction.
Limited Access	Only the specified IP address (s) or network address (s) can access.
Log Traffic	By activating the button, the management panel access logs can be sent to the Syslog server.
Certificate Based Authentication	The administration panel should be open if users are to be logged in with the certificate created. If it is open, no one can access the interface except the users of the management panel with the certificate.
