Service Definitions

Product: Antikor v2 - Next Generation Firewall
Guides
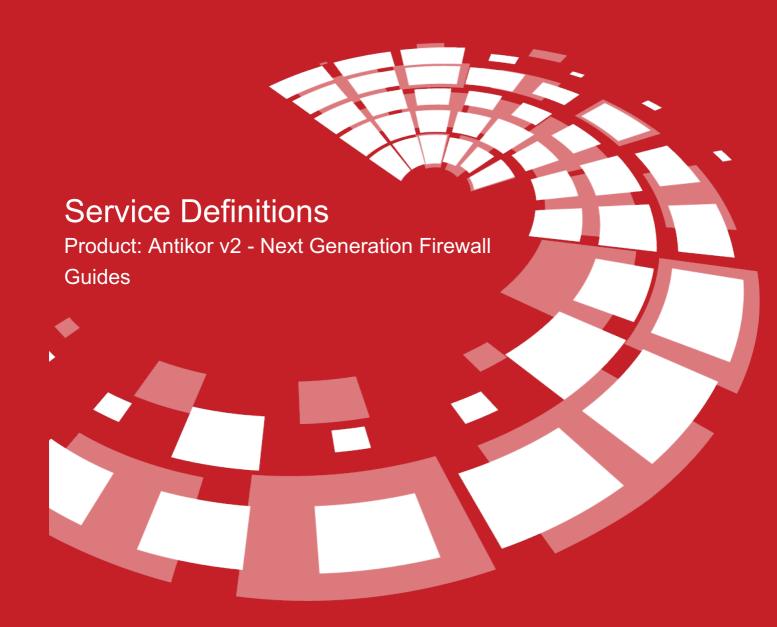

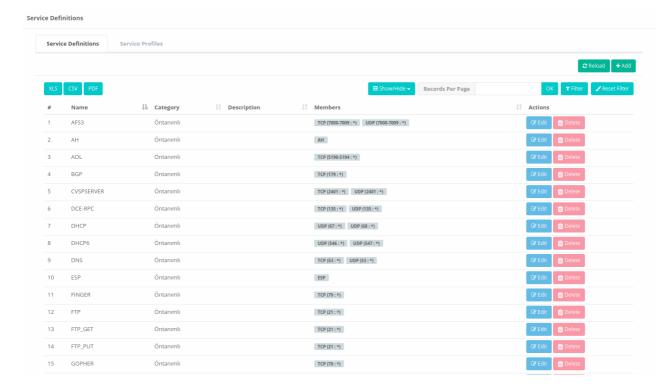

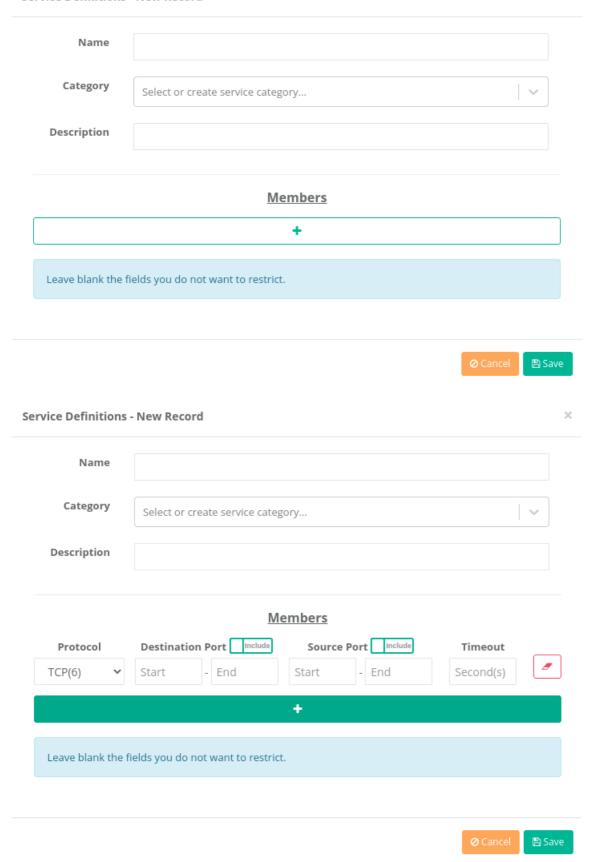

Service Definitions

Dos / Flood Mitigation, QoS rules, Security Rules, Policy-Based Routing(PBR), DMZ Access, Static NAT Access, NAT by Destination, SSH Control and Honeypot Settings define the services to use when writing policy.
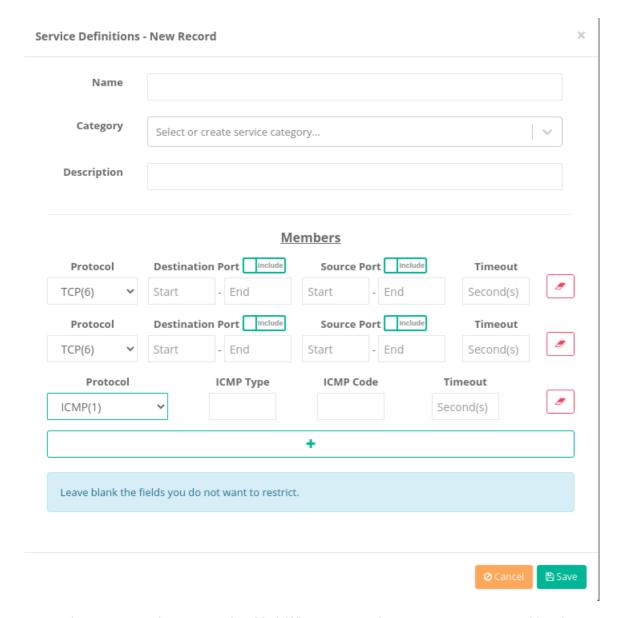

Service Definitions

There are 80 predefined categories that come in the default service definitions. It cannot be deleted or edited by the user. Service definitions created by the user can be edited and deleted later.

Service Definitions
