FIELD	DESCRIPTION
Source Group	The client group to which DNS filtering is applied is selected.
Target Action	The target behavior is selected. There are 2 options: create and copy a new group and copy to an existing group. (If create and copy a new group is selected, the group name, scope, and show on the registration form options are included.)
Group Name	Enter the name of the group to create a new one.
Scope	The scope of the new group will be entered.
Show at the Registration Form	If it is requested to be shown on the registration form, the box is checked.

**Note:** The following warning comes if “copy onto an existing group” is selected for**Target Actions**.

### Warning!

Settings for the target group will be deleted and settings of the source group will be written onto it!
