Notification Provider Definitions (SMS, Mail)

Product: Antikor v2 - Next Generation Firewall
Guides

Notification Provider Definitions (SMS, Mail)

In the event Antikor2 registration service is active the system automatically is able to send an confirmation code (via SMS) to any user who has completed the form. Notification settings can be set for system states.

Notification Provider Definitions

SMS Providers	SMS Settings	Mail Settings

#	Name	Method	URL	Successful Response Code	Invalid Characters	Transactions
1	İleti Merkezi	XML_POST	http://api.iletimerkezi.com/v1/send-sms	200		Edit Delete
2	Posta Güvercini	GET	http://www.postaguvercini.com/api_http/sendsms.asp	200		Edit Delete
3	TTMesaj_GET	GET	http://xml.ttmesaj.com/SENDSMS/sendsmsget.aspx	OK		Edit Delete
4	TTMesaj_XML	XML_POST	http://ws.ttmesaj.com/service1.asmx?wsdl	OK		Edit Delete
5	Dakik Sms	XML_POST	http://www.dakikapi.com/api/xml_api_ileri.php	OK		Edit Delete
6	TELSAM	XML_POST	http://websms.telsam.com.tr/xmlapi/sendsms	OK		Edit Delete

With this process, users can work independently of Antikor2 administrator if registration form approval is required.

SMS Providers

The SMS provider settings for the API must be defined in this menu.
