Real IP Access Only from the WAN

Product: Antikor v2 - Next Generation Firewall
Configuration Examples

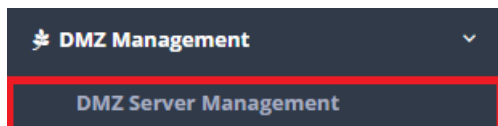

Real IP Access Only from the WAN

Servers are given an IP address from a different virtual IP address block than the local network. The local network is accessed with the local IP address and the internet with the real IP address.

Network Topology

Firstly, click DMZ Server Management under the DMZ Management menu.

In DMZ Server Management page, new register can be created or can arranged.
